

Power Tools Drag Race

Sign Up Today: 604-399-8000

Race: May 26th 2018

Where: Dougall Park

The **CoastMakers** are proud to offer the first **Sunshine Coast Power Tool Drag Race!**

Eligible machines are single engine power tools with limited motor and gearing modifications. Power sources must be stock 110V provided for the tool.

The drag strip is 40' of reasonably flat plywood track. There will be another 10' or so to slow down with added semisoft material (typically hay bales) to help with the deceleration of the faster entries.

Racers will run on parallel wood tracks 1' wide with 2" X 4" rails on either side. We will make every effort to maintain the straightness and accuracy of this track, but expect some variation and bumps at the joints.

Time to settle the score and prove who's got the fastest tool on the Coast!
